

Why Macrometa?

Web & Mobile Acceleration
50X - 100X better performance
higher engagement, retention & revenue

Real Time Analytics
Sub-second analytics at 80% less cost
than public cloud

In-region Data Processing
Solves GDPR issues

Cloud Data Processing Offload
70% reduction in cloud data ops costs

How we do it?

- Global State** We serve data from a globally distributed database instead of a centralized single region database
- Global Event Processing** Delivers Edge based, event driven architectures to process user interaction in real-time
- Global Compute Runtime** Delivers backends and APIs as serverless functions that run on a global CDN to serve apps with double-digit millisecond latency

Value to Customers

- 100X improvement in performance of data driven Apps & APIs
- 60% Reduction in net cloud spend on data and scaling costs for real time analytics compared to AWS and Google Cloud5G cloud services
- 3X-5X developer-velocity

An Edge Cloud for innovators

Serverless multi-cloud platform for enterprise developers

Distributed Event Processing

Dynamic Data Caching & Processing
