# Managed Detection and Response (MDR)

Proactive. Personal. Around-the-Clock.

PONDURANCE

Business leaders face many challenges when trying to secure their digital assets and operations from cyber threats. Security talent is expensive to hire and retain and products alone cannot stop a motivated attacker. As a result, many organizations are turning towards Managed Detection and Response (MDR) services to help keep their data and assets safe and compliant.

Recognized by Gartner, Pondurance MDR is the proactive security service backed by authentic human intelligence. Technology is not enough to stop cyber threats. Human attackers must be confronted by human defenders.

Benefits

- Stop security incidents through 24 x 7 detection and response
- Maximize internal resources and security investments
- Improve compliance through reporting
- Rapidly accelerate security program maturity
- Lower total cost of ownership (TCO)

The Pondurance Difference

24/7 US-Based Security Operations Centers

Our SOC never takes a day off. Pondurance MDR is powered by analysts, threat hunters and incident responders who utilize our advanced cloud-native platform technology to provide you with continuous cyber risk reduction. Our efforts have helped law enforcement at the state and national level track down cyber criminals and unveil numerous zero day vulnerabilities.
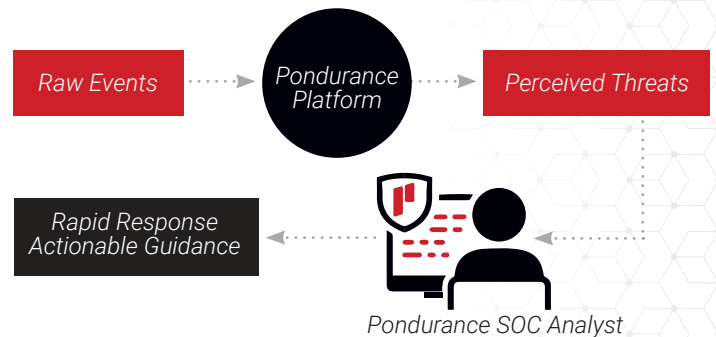

360 Degree Visibility

Pondurance provides best-in-class detection and response across:

Network — Fully-managed and monitored Network Traffic Analysis (NTA) sensors

Endpoint — Fully-managed and monitored EDR solution

Log — Fully-managed and monitored, SIEM as a Service platform

Cloud Infrastructure — including AWS, GCP, Azure

Raw Events → Pondurance Platform → Perceived Threats

Rapid Response Actionable Guidance ← *Pondurance SOC Analyst*

Closed-Loop Incident Response

Pondurance helps organizations reduce the time it takes them to respond to emerging cyber threats through instant triage and integrated Incident Response services. Rapid human intervention is often the difference between swift containment and business impact.

Integrates with Your Existing Infrastructure and Controls

No need to rip out your existing security investments. Pondurance integrates with your cloud and traditional security controls.

With Pondurance as your cyber security partner, you can stay one step ahead of attackers and let your team focus on what really matters.
