

The US food giant, Gordon Food Services, saves 330 hours per month with Avantra. The North American food distribution company deployed Avantra to speed up invoice workflows between SAP Ariba and S/4 systems. Avantra provides full visibility of invoices that get stuck between the food company's systems, lowering the cost of their operations by automating ABAP and technical operations.

Avantra custom checks fetch data from Gordon Food's SAP Ariba and gives the food retailer total traceability of their business processes, including alerts for negative amounts, payment failures and anything sat for more than 2 days. After just 4 weeks, Gordon Foods received immediate resolution and return on investment with Avantra!

## US food giant saves 330 hours per month with Avantra.

**330**  
hours per month saved
