

Empowering London SMEs: Navigating the EU AI Act

*Innovation, Compliance,
Collaboration - Your Path
to Ethical AI*

What is the EU AI Act?

The EU AI Act, a groundbreaking legislation by the European Union, establishes ethical and legal standards for the development and deployment of artificial intelligence, ensuring responsible innovation and protecting individual rights. For London-based small and medium-sized enterprises (SMEs) to remain competitive in today's AI landscape, understanding the EU AI Act is essential.

When Does the EU AI Act Come Into Force?

Scheduled to come into force in Q1 2024, the EU AI Act signifies a significant shift in the regulatory landscape, influencing how SMEs operate in the AI space. During this transformative period, AI & Partners serves as a go-to resource for guidance and support.

How Does the EU AI Act Affect Me?

The obligations under the EU AI Act include the development of high-risk AI systems with appropriate levels of accuracy, robustness, and cybersecurity, consistently performing at a relevant, representative, and error-free level, aligned with each AI system's specific purpose. These requirements must be clearly documented in the system's instructions for use.

What Are My Obligations Under the EU AI Act?

Furthermore, adherence to appropriate data governance and management practices is crucial, encompassing the use of relevant design choices, data collection, data preprocessing, formulation of assumptions, prior assessment of availability, and the acknowledgment of biases and shortcomings in training, validation, and testing datasets.
